

Online Parent Resources for Math Help

<https://www.ixl.com/signin/psdms>

We have purchased this excellent resource for all students at PS this year. It provides the students practice on every math content standard for every grade level. To sign-in, go to the website listed above. Your child's username is their first initial and last name with no spaces. The password is your child's student ID/lunch number.

www.khanacademy.com

This site provides brief tutorials on topics with which students may be struggling. It is very user friendly, but no practice.

www.aaamath.com

This is another site which provides practice.

www.aplusmath.com

A great site if your child still requires help with their basic facts.

<http://www.thenrocproject.org>

The NROC Project focuses on digital learning. This website will enable you to go to other sites. There is more than just math here!

Please note that I will be posting class notes, daily homework, and answer keys on my teacher page. (<http://www.brandywineschools.org/Domain/879>)

E-mail is the quickest way for you to communicate with me:
